### **PURPOSE**

The purpose of Advice Letter 1247 is to comply with Ordering Paragraph 19 of Decision D.18-12-021, which states that California American Water shall refund customers of its excess protected (plant related) Accumulated Deferred Income Tax (ADIT) based on the size of a customer's meter. The grossed up amount to be refunded is \$747,269. This refund will be amortized evenly over a one year period. California American Water is required to file a tier 3 advice letter annually for the protected ADIT of 2019 and 2020.

On July 1, 2019, California American Water filed Advice Letter 1247 (Excess Protected (Plant) ADIT Refund) and Advice Letter 1246 (Excess Unprotected (Non-Plant) ADIT Refund). Advice Letter 1246 was approved by the Commission on August 5, 2019. During implementation of the non-plant related excess ADIT refund requested in Advice Letter 1246, California American Water determined that Private Fire Service customers were receiving disproportionately high meter based refunds compared to water customer refunds. In Advice Letter 1259, California American Water reallocated the grossed up \$9.9 million, by creating a separately calculated bill credit for private fire customers by District, which in turn adjusted the refund amounts for water customers. Similarly, in this supplemental filing to Advice Letter 1247 California American Water reallocated the grossed up \$747,268.99, by creating a separately calculated bill credit for private fire customers by District, which in turn adjusted the refund amounts for water customers.

### **BACKGROUND**

At the end of 2017, California American Water re-measured its ADIT based on estimated amounts at the date of enactment of the Tax Cuts and Jobs Act (TCJA). California American Water classified the re-measured amount into two basic categories, plant related and non-plant-related. At the time, the amounts were \$40.6 million for the plant-related and \$7.1 million for the non-plant-related. During 2018, California American Water filed its income tax returns, which resulted in changes to the 2017 estimated re-measure amounts. In addition, California American Water completed its software implementation to a level where the plant-related amount contained within

the Powertax system could be used to produce the annual ARAM amount. As a result of this work, California American Water has refined its break-down of excess ADIT into the following categories:

Net Excess Amortization from Powertax	32,348,057
Federal NOL	(13,243,379)
<b>Total Subject to ARAM</b>	<b>19,104,679</b>
Plant items not in Powertax	(1,696,281)
Citizens UPAA	6,698,483
San Clemente Dam	11,414,643
Original Non Plant	7,105,278
Additional Non Non Plant	5,629,212
<b>Total TCJA Federal and State Excesses</b>	<b>48,256,013</b>
Pre TCJA ADIT Excess	199,213
<b>Total Excess ADIT</b>	<b>48,455,226</b>

In D.18-12-021 Ordering Paragraph 19, the Commission ordered California American Water to file a Tier 3 advice letter on June 30, 2019 to return the certain plant-related excess ADIT for 2018. California American Water assumes for the purpose of its 2019 rate case filing that the rate will be implemented on January 1, 2020. This process would be repeated for the 2019 and 2020 plant-related excess ADIT, with the excess ADIT for 2019 going back to customers in 2021; and the 2020 excess ADIT going back to customers in 2022.

Specifically, Ordering Paragraph 19, D.18-12-021, p.324-5, states:

*19. By June 30, 2019, California American Water Company (Cal-Am) shall file a Tier 3 advice letter to refund the 2018 Excess Protected Accumulated Deferred Income Tax (ADIT), which should have been recorded in the Tax Memorandum Account, to ratepayers as a bill credit, based on the size of the customer's meter. Cal-Am shall file Tier 3 advice letter by June 30, 2020 and a Tier 3 advice letter by June 30, 2021 to refund the 2019 Excess Protected ADIT and the 2020 Excess Protected ADIT to ratepayers as a bill credit, based on the size of the customer's meter. Each refund shall be amortized evenly over a period of one year. Each advice letter shall include any necessary revenue requirement adjustments to rate base caused by the return of the ADIT balances. In each advice letter, Cal-Am shall provide calculations and supporting documentations that demonstrate: (1) an estimation of the Excess Protected ADIT for each year, (2) how the Excess Protected ADIT balances were calculated for each year, and (3) the normalization method used. Cal-Am is not required to refund the Excess Protected ADIT balances faster or sooner than allowed pursuant to the normalization rules of the Internal Revenue Service.*

Excess ADIT liabilities within Powertax, net of excess ADIT asset related to Net Operating Loss Carryforward ("NOLC"), account for \$19,104,679 of the total plant related differences. These amounts are generally amounts subject to normalization or so-called "protected" ADIT. It is the excess ADIT that is maintained in the Powertax system, and that will normalize using "Average Rate Assumption Method" (ARAM) that California American Water believes is within the scope

of ordering paragraph 19 of D.18-12-021 and the related Tier 3 advice letter.

In addition, certain plant related differences such as ADIT related to Construction Work in Progress (“CWIP”), Customer Advances for Construction (“CAC”), Section 481(a) adjustments not yet amortized, as well as deferred tax related to San Clemente Dam regulatory assets and the Citizen Utility Plant Acquisition Adjustment (“UPAA”), are all maintained outside of Powertax. The excess ADIT related to these plant related amounts total \$16,416,845. California American Water does not believe these amounts are in the scope of the Tier 3 advice letter associated with Ordering Paragraph 19 of D.18-12-021 and are therefore included in California American Water’s 2019 GRC filing. Please see the Direct Testimony of John R. Wilde submitted with California American Water’s July 1, 2019 general rate case filing for the disposition of these excesses.

### **Computation**

In general, ARAM is a method where by deferred taxes reverse at the average rate that they were provided. So, for example, assume an asset was put in service when the tax rate was 35% and the temporary difference for that asset was provided each year up to 2017 at a rate of 35%. In years after 2017, deferred taxes are provided at the new rate of 21%. At the point in time when the temporary difference begins reversing, the average rate is computed by dividing the deferred income tax balance by the temporary difference. In the example above, the rate will fall somewhere between 35% and 21%.

Because deferred taxes will reverse at a rate other than 21%, but the current tax impact of the temporary difference will be at 21%, the difference between the current tax effect at 21% and the deferred tax effect at some other rate will result in the effective “refund” of the excess ADIT.

Workpaper 2-1 summarizes the net excesses that exist in Powertax. The numbers on lines 2 and 3 come from the included report 259 from Powertax. Report 259 from Powertax is used because it shows current year activity to the temporary difference, and current year activity to regulatory ADIT (it labels this activity as APB 11 activity). In addition, it shows the excess ADIT in columns labeled “Regulatory Liability before Gross Up” and “Regulatory Asset before Gross Up”. Line 5 represents the excess deferred asset related to the net operation loss (“NOL”) carried forward. Line 6 represents total excess subject to ARAM amortization and California American Water believes this net excess is within the scope of the refund outlined in Ordering Paragraph 19 of D.18-12-021.

Lines 8 through 11 show the credit amount net of the rate base impact. The Credit amount on Line 8 comes from the schedule labeled intermediate workpaper and the rate base impact amount on Line 10 comes from the schedule labelled Proration – rate base.

The intermediate workpaper uses the data from Powertax report 259 to compute the difference between current tax effect at the current rate versus deferred tax effect computed within the system using ARAM. In addition, the intermediate workpaper layers in proportional amortization of the NOL excess ADIT asset.

Water Revenue Adjustment Mechanism (WRAM) and Modified Cost Balancing Account (MCBA) Surcharge

- Per Advice Letter 1162-A, the balance of the 2016 WRAM/MCBA is \$220,016 including interest. D.18-12-021 raises the cap on WRAM/MCBA surcharges to 15% of the authorized revenue requirement. If the WRAM/MCBA was billed based on the balance, the current authorized consumption, and the adopted amortization schedule per D.12-04-048 Appendix A, the volumetric surcharges would be \$0.1279 per 100 gallon over 36 months.
- Per Advice Letter 1230-B, the balance of the 2017 WRAM/MCBA is \$184,986. D.18-12-021 raises the cap on WRAM/MCBA surcharges to 25% of the authorized revenue requirement. Since existing 2015 surcharge (Special Condition #6) meets this cap, there is no charge on the bill at this time. If the WRAM/MCBA was billed based on the balance, the current authorized consumption, and the adopted amortization schedule per D. 12-04-048 Appendix A, the volumetric surcharges would be \$0.1075 per 100 gallon over 36 months. After cessation of the 2016, a separate Tier 1 filing will be made at that time to update the tariff language with the current surcharge.
